Date 3/9/9 SUBJECT: Intelligence Disseminations of War Depart HRP qy-1 Detschment, APO 403

Chief of Mission War Department Detachment

Reference is made to your letter, above subject 20 October 1946.

- 2. Your predecessor detachment has been an importance contributor of intelligence required by the Office of Military Government for Germany (US), especially that concerning the other occupied zones. Such information is extremely useful to us in the formulation and execution of U.S. Military Government policy and in negotations on a quadripartite basis. Until there is a free exchange of information among all four of the occupying powers, I shall continue to need such information and such other help and assistance as you can render me through my Director of Intelligence.
- Specifically this office is interested in securing all available data which you may obtain on political, economic, and sociological developments in the other zones of occupied Germany, as well as in its peripheral countries such as New Poland, Poland, Czechoslovakia, Hungary and Austria, where conditions have a bearing on Germany and the Military Government of Germany. To assist you in assessing our interests I have had my Director of Intelligence prepare a detailed list of subjects which are of special import to Military Government. Because of the consolidation of the U.S. Army Headquarters, Berlin District, with this office, certain matters of purely Military Intelligence of concern to the Assistant Chief of Staff, G-2, Berlin Troop Command, have also been included in these requirements in a separate paragraph. The present list has been purposely prepared along somewhat general lines since any information on these subjects is of use. From time to time I am likely to require special reports on specific subjects of concern to Military Government; all such requirements will be submitted to you through my Director of Intelligence as individual requests.
- 4. It is my desire that the Office of the Director of Intelligence of this Headquarters handle the distribution of all intelligence reports to any interest echelons of Military Government. This method of handling dissemination should enhance the security of the information received from your detachment.
